[VOLUME - 5]

INTRODUCTION

This manual has been prepared by Pragma (www.pragya.org), a not-for-profit, development organization, working for the appropriate development of the vulnerable communities and sensitive ecosystems of the world.

The Tribal / Border / Hilly / Forested districts of India are characterized by remoteness, distance from administrative centres, weak infrastructure and often prove to be the toughest challenges towards achieving education goals in India. While most children are now attending schools, how many of them are empowered by the education they receive to take up more meaningful roles for the communities? The primary education that the children receive in their formative years, how appropriate is it and how student friendly are the modes of instructions?

Pragma has long experience of working in some of the remotest and most marginalized regions. It has come up with seeks an area-specific, cost-effective, community-based system of monitoring and generation of education data - DEISPI. The system generates data on 3 dimensions – student reading levels, instruction quality and school operations. Student Committees, Village Education Committees, Parent Teacher Associations and Barefoot Monitors (local youth) are trained to collect the data. This data is then analyzed and used to guide area-specific planning, as well as school/teacher/student-specific improvement actions.

DEISPI is being piloted across 330 schools in 11 districts in India. Education experts from 135 districts have helped in designing the system.

ASSESSMENT MODULES

This volume contains the complete set of assessment formats under DEISPI for:

NUMERACY SKILLS

Test 1. Oral counting

Q1. Ask the student to recite numbers from 1 to 10

Test 2. Number recognition

Q2. Ask the student to recognize the numbers from randomly arranged numbers ranging from 0 to 10

10	4	8	7	1
3	5	9	2	6

Test 3: Quantity discrimination

Q3. Give five pairs of numbers and ask students to identify the bigger number.

1-3	4-8	5-7	6-9	2-5
-----	-----	-----	-----	-----

Test 4: Missing number

Q4: Give a list of 5 arithmetic series with 3 numbers each. Remove one of the numbers and ask the students to identify the missing number.

a. 2, __, 4 b. 5, __, 7 c. 3, ____, 5 d. 8, ____, 10 e. 7, __, 9

SCORING:

Test 1. Oral counting (1-10)

- Score 10: If the student can recite all the numbers from 1-10 correctly.
- Score 5: If the student can recite up to the numbers 5 or 6 correctly.
- Score 0: If the student cannot recite the numbers at all.

Test 2. Number identification (0 – 10)

- Score 10: If the student can recognize all the 10 numbers shown.
- Score 8: If the student can recognize around 8 numbers shown.
- Score 6: If the student can recognize around 6 numbers shown.
- Score 4: If the student can recognize 2-4 numbers shown.

LITERACY SKILLS

Test 1: Oral reading fluency

Q1. Read a paragraph of six to seven sentences with accuracy.

Green is a beautiful color! In nature, the grass that you walk on is green and the leaves that you see on trees are usually green. Most of the plants that you see are green too! Frogs are green and many grasshoppers are green too. Turtles are different shades of green.

Did you know that you can make green colour by mixing blue and yellow? Because you can make green by mixing two primary colors, it is called a secondary color.

Green is also the name used to describe the movement to make products that do not harm the Earth. Green products are often those made from recycled materials or those that are safe to throw out in the trash.

Test 2: Understanding

Q2. Give the student a paragraph (10-15 sentences) for a reading comprehension. Ask 3 questions pertaining to the text read out.

What do three hearts, eight arms, and one huge brain add up to? An octopus, a creature that can do amazing things.

Octopuses are extremely intelligent. They can learn new things just like humans. Octopuses don't have teeth or sharp claws to defend themselves. Instead, they use more clever ways to fool their attackers. Octopuses like to hide themselves in the sand on the bottom of the ocean floor. The octopus is like a chameleon because it can change the color of its skin to match the sand.

Another way an octopus can hide is by shooting ink. An octopus uses a part of its body called a siphon to shoot ink into the water. The ink forms a cloud that hides the octopus. By the time the ink clears and the predator can see again, the octopus has swum away or hidden.

If an octopus is in trouble, it can break off one of its arms. The arm will then change colors and move around in the water to distract the predator while the octopus swims away to safety. The octopus's broken arm will grow back.

Questions:

- A. How many hearts and arms does an Octopus have?
- B. How are an octopus and a chameleon alike?
- C. What happens to an Octopus if it loses one of its eight arms?
